## About This Game

Welcome to the Realm of Six Seasons, where the predictable cycle of nature's seasons has turned constantly since time began.  
But now, something is wrong.

A bright Summer's day ends in a snowy Winter's eve. The next morning brings a burst of colorful Autumn leaves and even that is followed by a surprising deluge of Springtime rains. Something (or someone) is tampering with the precious Seasons, making a complete mess of the Realm.

The Druids of the Esoteric Orders have long fostered this fertile landscape and tended to this delicate mystical balance. And it is up to Warren, a young druid fresh from his Esoteric Training, to discover what is causing this disastrous mixing of Seasons.

With a game board that changes based on players' actions, and units that each have powerful animal abilities, you'll need to stay focused and never let your guard down.

Whether it's the single player story told across more than 130 levels, local or online multiplayer for up to 4 players, there's enough variety for new and experienced players.

The professionally composed soundtrack and recorded music brings the Six Seasons beautifully to life.

Nothing is random in A Druid's Duel. A simple set of rules governs the board, allowing the game to be learned quickly, with various difficulty settings to match your current ability. But at its highest difficulty expect to spend months mastering the nuances that manipulating the board can create.

a druids duel

Rich Story. VERY RICH.

&

It's a free game so you don't have expect sth like Walking Dead or The Wolf among us.

9 Endings in the game just complete each other i guess (so if a game would do that, give it a shot !!). Excellent application if you're working with any RPG Maker engine. It's cheaper and more streamlined than Photoshop. (That's what I was using before.) It's very easy to set up the grid so you can rearrange and edit tiles, too. I'm well versed with Photoshop and GIMP. But GCH is a great tool because it's so specialized for 2D spriting. You can see a walk cycle preview, for example. It can convert sprites from XP to Ace so they fit the number of frames. It can even handle the old 2000 and 2k3 sprites. It features random sprite generators that are easy to customize and set up. Some people expected it to have "behavior" bases and corresponding parts, for animations or poses, like dancing or collapsing. It doesn't. (I have no idea where that expectation came from. At least one person already made a "down" base. Just consult the internet.)

Yes, VX Ace has a built-in character generator, but you can't even adjust colors without an outside editor. GCH allows much more freedom for what parts you're able to use and how you can layer them. The resource sets it comes with are for RPG Maker XP and VX Ace. (If licensing is an issue because you're using some other engine, you can always import your own sprite parts...)

Now, this might not be the best tool for making a sprite entirely from scratch, for a number of reasons. But it's probably one of the best options for editing sprites or piecing them together. If the price is too steep for you, just wait for a sale.. I have never played Limbo like the previous reviewer so I have nothing to compare this game to. Its a dark puzzle game which has seen me gassed, spiked, sliced open with a swinging axe thing, burnt to dead and fallen into the dark abyss below. I'll be honest i was surprised by how much I liked this game.

First thing that caught my eye was it was so cheap. The controls felt basic at the start but it didn't take me long to get used to them. Also For anyone who thinks the game is too hard the game creators in their mercy have put in a hint key. Anytime your stuck hit the H key and you get a hint at the area your stuck at. Tempting to use all the time but it still doesn't ruin the puzzle when you do use it.

Also a great bonus is the respawning so close to where you die. The checkpoints must be every 5 or 10 steps as I never seem to respawn too far away from where i died. In a puzzle game like this where you die a lot this comes in handy.

The grusome ragdoll deaths keep in with the tone of the game if that makes sense and even the way the characters ponytail bobs when running are wee signs the creators were thinking when putting this together.

I'm gonna keep playing this as it has my attention.

Heres a first level play through if you are still making up your mind.

P.S Any laggyness is the fault of my computer running recording software at the same time. The game itself is usually smooth when the recording software is off.

<https://www.youtube.com/watch?v=T7RNzLhLg9Y>. This game can literally not be finished!!... I actually played this game many years ago on the Xbox when it was released and I remember clearly finishing it however it looks like this PC port is bugged or something as I can't seem to progress any further after a certain point...

Overall the game itself did get a few laughs out of me but it is way too short and has quite a few problems which hurt it in the long run in my opinion...

Also afterwards I decided to watch someone play this game on YouTube and it turns out everything I did was correct as they did all the things I did but they were actually still able to progress further while I wasn't... they were playing the Xbox version so it looks like the PC version has a game breaking bug which stops you from actually finishing it which is a major oversight on the developers part.... Very funny, must buy it ! I didn't know anything about this before seeing it on sale on the steam store and after watching some episodes of the first season I bought the second now I watched both I'm waiting for the third one !. shot

zambi.... shot bambi???. They said that they were going to update, a year later, nothing.

Its probably an idea to see what company they next use and avoid.. Hello Friends! This is the season pass that gives you access to all the story DLC's for the game. I got this when it was on sale, and was pretty satisfied with the cheap price i bought it at. Considering there is only three dlc's it opens, it is probably better to buy the ultimate franchise pack when it is on sale.

Recommended for paying for it instead of buying all the story dlc's separate, which would cost more.. If you were a fan of the old text based games, along with puzzle's and brain benders, then you will like this game.

Yes, not to everyone, but for girls ages 9 and up. I'm 12 and I love this game!. When I heard the announcement of this route I was so excited! But now that I have it, I'm pretty off...

There are a LOT of bugs with this route, some are:

- 1) When I am using the Comet V cab car with the ALP-45DP and I turn on the bell from the Comet V cab car, the bell turns on also in the ALP-45DP.
  - 2) When I am using the F40PH-2CAT loco, pressing "B" doesn't turn on the bell which it should.
  - 3) There's only ONE scenario for the Comet V cab car.
  - 4) There is a LOT of lag. I have a very high end gaming PC and I still get VERY bad performance, it is so annoying!

Overall, I do NOT recommend this route. I paid \$45 expecting something great, that obviously didn't happen.... best game and very cheap lol 5/10. sounds DECENT ENOUGH..but it gets old really chappling fast  
LOVE THE BURRITO MASTER!!!. I first read the webcomic over ten years ago, so I was pleasantly surprised to see a visual novel based off of it getting on Steam and bought a copy as soon as it was released on Steam. I hoped that maybe I could recommend it to friends who've never gotten into the series and interest them into picking up the comics.

As much as I wanted to though, I can't really do that in good conscious, so that's why I had to downvote it.

Now, it's not to say that there aren't any merits. Mayshing's art and character designs continue to be beautifully done. Any fan of the eDepth Angel comics will be happy to know that everyone's characterizations aren't off in the least. If anything, I thought it was refreshing to be able to spend some time with Lien and Kolei before they became cyborgs since it was only briefly touched upon before. It was also pretty neat to be able to get to know Kolei and Seon along with Lien.

For me though, I think there were two main issues about the game. One was how I personally found the mystery solving portion of the game too confusing and the other was how there's too much information that a newcomer wouldn't know but is considered commonplace knowledge for the cast. At the very least, it'd probably be recommended to read the game's About section for any information not brought up in the game clearly. (And even then, there's some stuff you'll miss, such as Angel's drive to cure ...)

Sure, the game's story isn't exactly straight off of the comic and some things actually go down differently, but it's not really enough to say that it's standalone.

"So okay, it's not a standalone game, but if you've already read the comic then it should be fine to play, right?"

*Well... perhaps? It's true that I understood what was going on just fine as a comic reader but... it could just be my own ineptitude but I actually found the investigation aspect really hard?*

*Like, there's no clear indicator which ones you actually need or if the order of the evidences you placed in the timeline is the correct one. I just found myself praying that I got it right even though nine times out of ten, I immediately got myself in unintended (usually bad) endings.*

If you're able to understand how to go through those sections or if you have the walkthrough at hand then maybe your opinion would probably be more positive. But those two flaws didn't really sit well with me too much to like the game enough. :c. Two things

- Farting animals.
  - Making the dog run in the world map is so relaxing.

*Worth it.. My play through:* <https://youtu.be/mOwo0kbfoFI>

From what I understand this game gets updated every day. Although I have not played the full version yet out of beta, I still had a good laugh out of this one! It is neither too long, nor too short. It is one of those games where you really need to explore every part of your surroundings for the various endings. Overall, I had a good time with this one (:
