About This Game

Oozi: Earth Adventure is a classic 2D platformer with old school gameplay - no puzzles, no punishment, just 100% pure classic platforming fun! Its most prominent features are HD visuals and beautiful hand-drawn art, but despite its visual style, it's a good fit for all kinds of gamers. The variety of difficulty levels – from Kid to Hardcore – allows everyone to enjoy the game

regardless of their skill level. It tells the story of Oozi - an alien spaceship pilot who crashed on planet Earth, lost his space suit and needs to find his way home.

The game heavily utilizes Steam integration, including Achievements, Leaderboards, Cloud Save, Trading Cards and special feature – Quantum Ghosts, holographic recordings of players from alternative universes.

- Relive an **old-school** platformer experience - this time with beautiful, **high-definition visuals**.
- Four difficulty levels, including Kid difficulty - made specifically for the youngest gamers
- Quantum Ghosts - watch how players from alternative universes played through the game
- Challenge mode - additional 44 short, but extremely difficult levels with various objectives
- Fight **various enemies** and discover new gameplay mechanics in **distinct worlds** - jungle, cave, lab or even an alien planet.
- 5 hours of story mode – 20 levels and 4 boss fights
- Steam Achievements, Leaderboards, Cloud Save, Trading Cards and Full Controller Support

- Oozi Earth Adventure offers an addicting platformer experience that harkens back to the days when "scrolling parallax backgrounds" were super hip and the entire summer's agenda was to set a new high score. - Impulsegamer

One of the better HOG games published by Artifex. A nice story with a little bit of steampunk theme. The puzzles are the well known variants of the Artifex games, so this might be a let down for people who expect something different. Fortunately the hidden object parts are relative good integrated in the story.

The graphics vary. While the scenery is very nice, the animation and the people is simplistic. Voice acting is a bit on the weak side and stilted mainly because the dialogs are not written that well.

Not much of side achievements; just find the atomic symbols in the scenery.

Recommended, especially if you can get it at a discount. It just lacks that little extra bit of polish which would have made it great.. great game for a cheap price. Fun, simplified tank combat. Visuals are pretty nice, wish the game were optimized a bit better though. Feels like it takes more to run this at a reasonable framerate than the game is really pushing out. Controls might confuse you a bit at first since reversing actually inverts your controls. Biggest gripe I can think of with this game is the lack of players, as I'm guessing this is pretty obscure. Be sure you have a couple of friends to play this with.. This is a great game however you need to be careful with the fire island levels as the jump pad will send you over the island if you don't move back wards. Otherwise GIT GUD.. I'm fairly new to VR gaming(Oculus) and this game is one of the top 5 games I played so far. It's on my list of games to get people to play and so far it a real winner with everyone. At the end of the night most people ask to play it again to see if they can get further.

Everyone who played it loved the reloading of the gun once they got a feeling for it. I had friend get carpet burns from diving under a desk. I felt over once when I tried to use the virtual desk to stand up. Another friend lied on his stomach to shoot underneath the desk to get their legs and it worked. You can even shoot yourself in the head.

Not a big fan of the machine guns, it's hard to aim so I just spray and pray when I get one.

I had no issues with the game so far. Keep up the excellent work.

I got this game on special but I would have happily paid full price of it. Get it you won't regret it.. The thumb down is not for Mai, but the offer. You just give the buyer two costumes, with only different color?! Pay another money for more costumes, come on! Don't bother look at this one, just buy the bundle with her costumes + KOF mash up to save your money.

I love old classic game where you must finish several requirements to get additional costume, not buying it.

Well aside of that, I really love this character, she's pretty well designed. It's just annoying that I should using the same costume before able to afford her additional costumes.

Tips for anyone who've bought this DLC already, you better buy the additional DLC in unit, that is the debut costumes and KOF mash up. Buying the bundles will spend more money.. The single player campaign was pretty fun, the remote control vehicles are really cool to play around with. You get lots of options as far as weapons go. The vehicle handling is slightly awkward compared to the Battlefield series, but you get used to it quickly.

Multiplayer gameplay is not spectacular, but good enough to be fun, and there are still plenty of servers (as of June 2011). I would recommend Frontlines just for the singleplayer portion alone.

Deeply unfinished game that would make a great vertical slice for a final product, but as of the most recent v1.9 update, is still in a broken, extremely short state. The unzoomable single map, cluttered UI, and utterly broken Russian side make even a half hour with this title a chore. There may be a good RTS buried in here somewhere, but this game should have stayed in development behind closed doors for at least another year before showing up in EA.. I'm always picky with VR Puzzle games and this one did it right! It got me sitting on the floor playing with blocks to solve simple yet complicated puzzles. You get to a point where you need to align everything fast and line em up and connect em as fast as you can! I've only played a little bit and plan to play a lot more the next time I get in my Vive!. A really fun game involving time shenigans. Although the game could use a little polishing in terms of making it easier for players to see what to do. e.g. making buttons you have to press brighter, adding an icon indicating you have to throw something at a certain thing etc.

Definitely would reccomend if you like puzzle games, freerunning or dunking on kiddos across time and space. 10/10. I wish there was a yes and no button for recommending this game to people. I only recommend it to people that are REALLY interested in space stuff. I was a little disappointed with how short it was but I understand that you guys had a team of only 5 programmers or so and programming a 3D game in itself is difficult. I just wish there was more content. :)

Good job though and I commend your efforts to educate people on how to figure out someone's location using radio signals.. Gon' E-Choo is a mostly an arcade styled game with a little bit of first person movement. Apperantly this game is based off of a web comic series about a gator and a otter that's in the style of those old Pogo comics, I've read some of them and they are entertaining. The arcade gameplay plays just like the Popeye Arcade game, collecting trinkets to move to the next level, avoiding a big guy, etc. That's the main highlight of the game and it's good and challenging fun. Not sure what's the deal with the first person movement, aside from interacting with the arcade game, the only thing you can do is just look around and view parts and pieces to the arcade cabinet. But then again it's an early access game so I can't be too critical, still feels like a finished game. And with its fun arcade throwback and cheep price, I say it's worth it
